

EM82.1 Client

The EM82.1 Client Library offers the option of connecting to temperature control units using Euromap 82.1 communication. The SIGMATEK system works as an OPC UA client.

The Euromap 82.1 standard describes a uniform interface between injection molding machines and temperature control devices (TCD = Temperature Control Device) and offers options for reading out status information, setting setpoints, transmitting alarms and much more.

FEATURES

- OPC UA-based interface for temperature control units (TCD)
- Alarm transmission
- Prefabricated data point objects for data storage
- Secure communication via SSL encryption
